Tomasz Nieżurawski

Remote JavaScript Developer / Front-end Developer

tomasz@niezurawski.pl | Github | LinkedIn

Summary

I'm a proactive team player with a strong love for great UX and making choices based on data. I love to implement non-trivial interfaces. 12+ years in the industry working full time and ~19 years including part-time. 9 years in remote positions.

I have some side projects and libs that I own and share with the community.

Experience

Principal Engineer

10.2018 - until now @ Phorest Salon Software

Role:
I'm responsible for bringing the existing product into the web. Phorest is aiming to be a global leader in the salon software industry and it has to operate on different media. My job is to make sure our front-end is slick and rich for modules like marketing or reports but at the same time, it needs to be super easy to use on a daily basis for salon staff.

Technology:
Ember.js, GraphQL HTML5, CSS3

Titles (former):
Staff Engineer (12.2021 - 01.2024)
Tech Lead Front-end Developer (08.2021 - 12.2021)
Senior Front-end Developer (03.2020 - 08.2021)
Front-end Developer (08.2018 - 03.2020)

Founder & Full-Stack Developer

06.2018 - 12.2022 @ checknlearn

Role:
[CLOSED] I was responsible for the development of the whole product, it means business, marketing and of course development. I do the backend and front-end of the service that lets you learn new vocabulary effortlessly.
Parts of the service I built: Chrome Extension, Mobile App (iOS + Android via React Native), website (Gatsby), web app (React), backend (Loopback).

Technology:
React, React Native, Redux, Browser Extensions, Gatsby, LoopbackJS, MySQL

Co-Founder & Full-Stack Developer

01.2016 - 12.2022 @ ZaklepSchronisko.pl

Role:
[CLOSED] I was responsible for the development of the whole product, it means business, marketing and of course development. I do the backend and front-end of the service that lets clients book a place in shelters placed in high mountains.

Technology:
Angular, React, Redux, LoopbackJS, MySQL

Senior Front-end Developer

03.2016 - 09.2018 @ BrandnewIO

Role:
I was responsible for the architecture of two Ember apps that have been developed over the last 4 years. Keeping them up-to-date and adding new functionality. I managed to increase code coverage and shift towards higher usage of integration and unit tests. I did a Code Review and planned how we split the work. I released a few add-ons to help the community and wrote some articles about Ember.

Technology:

Ember.js, HTML5, CSS3, SASS

Environment:

OS X, Git, Github, CircleCI, Slack

Other responsibilities:

Code Review

Keeping an eye on Mixpanel

Front-end Developer Consultant

08.2015 - 03.2016 @ IT Kontrakt

Role:

I was responsible for implementing medical platform services. Working with a remote team from San Francisco.

Technology:

AngularJS, Angular Material, HTML5, CSS3, SASS

Environment:

Windows, Git, Stash, Bamboo, Jira, Scrum

Other responsibilities:

Code Review

Senior Front-end Developer

10.2014 - 08.2015 @ Pearson IOKI

Role:

I was responsible for implementing front-end for services in the e-learning industry. Working as a Senior I had more responsibilities including recruitment process and exclusive rights for accepting or declining code that went into production. I was also making workshops about Angular.

Technology:

AngularJS, CanJS, HTML5, CSS3, SASS, LESS

Environment:

OS X, Linux (Fedora), Git, Gerrit, Jenkins, Jira, Scrum

Front-end Developer

10.2013 - 10.2014 @ IOKI E-volution in education

Role:
I was responsible for implementing front-end for services in the e-learning industry which was a lot of fun. I worked on several projects with various technologies. I also did technical parts of recruitment process.

Technology:

AngularJS, CanJS, HTML5, CSS3, SASS, LESS

Environment:

OS X, Linux (Fedora), Git, Gerrit, Jenkins, Jira, Scrum

Web Developer

12.2012 - 10.2013 @ Fibaro

Role:

I was one of the first few developers in the company. I would call Fibaro a start-up back then.

I was responsible for implementing awesome designs for home automation service and beautiful

pages for marketing purposes.

Technology:

JavaScript (VanillaJS), jQuery, HTML5, CSS3, Prototype, PHP, MySQL

Environment:

Windows, Git, SVN, Bugzilla

Other responsibilities:

Maintenance and development of CMS Drupal.

Creating tools for internal usage.

Web Developer

12.2005 - 12.2012 @ niezurawski.pl, freelancer

Role:

Working part-time on gigs. Contacting with clients, creating designs, and implementing them.

Technology:

XHTML, CSS, JavaScript, Flash, Photoshop, PHP, MySQL

Skills

JavaScript

- VanillaJS, ES6+
- GraphQL
- Design Patterns
- TDD (testing with QUnit, Jasmine, Chai, Sinon, XO, Jest, enzyme)
- Web Performance freak

JS Frameworks

- Currently: React Native, React, Ember.js 5, Loopback
- Used to work with: Angular 2, Angular 1.x, CanJS

Front-end
